

Docket No. HUANG04
US App. No. 10/537,841 «APPLICATION_NO»

IN THE SPECIFICATION

Please amend the paragraph beginning at page 3, line 7, as follows:

In the state of normal temperature and pressure, the catalyst for clean pulping according to the present invention can perform the soaking and catalyzing process to the raw materials which are ~~eutted~~ cut into pieces and removed the impurities. Because copolymerization reaction is produced, Fibrous performance of the raw material is changed from microscopic view. After being rinsed, the pulp which could be used to make paper can be produced. All kinds of herbs can be used as the raw materials of the present invention, such as straw stem, including wheat straw, rice straw, corn stalk, cotton straw or reed. Due to the abound resource, low price, wheat straw becomes the preferred raw material.
